Rotor Inspection

email: tms.sales@torus-group.com
www.torus-group.com

Torus Measurement Systems are suppliers of world-class solutions for dimensional inspection of rotor gauging.

- Manual gauges
- Semi Automatic Machines
- Integrated Automatic Gauging
- Complete production line inspection systems

Torus Measurement Systems Modular design construction gives complete flexibility when specifying your requirements whilst remaining reliable, accurate, durable and cost effective.

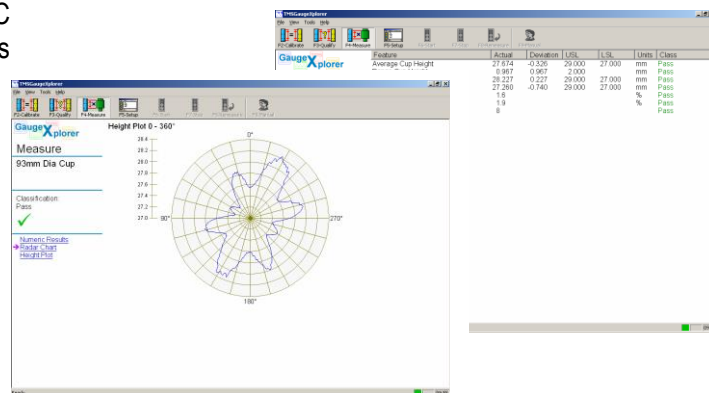

Gauges can be designed with fixed tooling or adjustable to accommodate component variants with minimal changeover to suit today's flexible manufacturing trends.

TMS GaugeXplorer software ensures the operator is presented with clear, concise information. Analytical information is also available for process improvement and monitoring when required. Machine tool feedback options are available.

SPC data can be stored locally, networked and either viewed on our REPRO 2000 SPC package or exported to your companies preferred package.

- Simple to use
- Clear to view
- Minimal Training

Measurements include:

- Diameters
- Lengths
- Concentricity
- Squareness
- Runout Runouts
- Angular Position

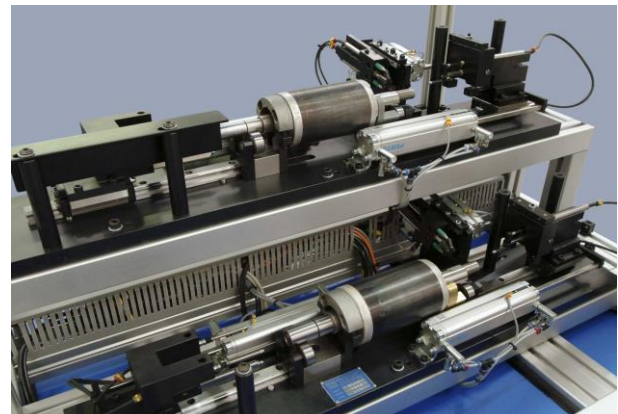

Gauges can be designed to accommodate a variety of different components with minimal tooling changeover.

Other technologies can be incorporated at customer request

- Component Marking
- Non Destructive Inspection

Typical GR&R, accuracy, reliability figures are available upon request from existing data - although will be quoted on a case-by-case basis.

With our gauges using transducers and digital probes allied with Certified Calibration Setting Masters from our UKAS accredited laboratory, you can be assured of accurate, repeatable and traceable measurement of your components 24 hours a day, seven days a week.....
